

Zehn Online

Your child grows. So do you.

Live coding and AI classes with a real instructor, for students aged 8 to 18, where parents learn too.

Choose *your plan*.

STEADY

1 lecture / week
4 live lectures a month

A gentle pace for younger students or busy school terms.

RECOMMENDED

BALANCED

2 lectures / week
8 live lectures a month

The best balance of steady progress and time to practise.

FAST TRACK

3 lectures / week
12 live lectures a month

Faster progress, ideal for older students or holidays.

Every lecture is a 60-minute live session. Add extra lectures anytime.

Family *friendly*.

Siblings together Up to 3 siblings at a similar level share one lecture, for a small add-on per child.

Different levels Siblings at different levels take separate lectures, with a sibling discount on each.

Parents included Parents are welcome in every lecture, at no extra cost.

Limited time *offers*.

Early bird

The first 30 families lock in launch pricing for 12 months.

Refer a family

Both families get 2 free lectures.

Pay quarterly

Pay 3 months upfront and get 2 lectures free.

What's *included*.

- Live online lectures with a Zehn instructor
- Parents welcome in every lecture
- Problem-first lessons that start with a real problem
- The full Zehn curriculum, adapted to your child's pace
- A weekly practice roadmap with a parent checklist
- Short, optional daily practice, never heavy homework
- A real project at every stage, saved in a personal portfolio
- Monthly progress report on WhatsApp

Parents grow too. *Learning that brings families together.*

In every lecture. We explain each topic to you and your child together, with a short recap if you can't stay.

Between lectures. A weekly roadmap of short activities, with a checklist you can follow.

Every month. A progress report on what your child learned, built, and is working on next.

What your child *will build*.

LEVEL 1

A game they designed

Their own animated story or maze game in Scratch, then basic Python.

LEVEL 2

A real app

A working app with buttons that saves data, like a virtual pet.

LEVEL 3

Their own AI-powered product

A web app built with AI, which they pitch like a real startup founder.

A free placement session decides where your child starts. Older students move faster.

Good to know: Plan pricing is shared on WhatsApp or right after your child's free trial. Billing is monthly in advance. Free rescheduling with 24 hours' notice. Up to 2 unused lectures carry over. No long-term contract: pause or stop before the next billing date. Requires a laptop or desktop, stable internet, and a webcam. **Safety:** all communication goes through the parent's WhatsApp, never directly with the child, and a parent should be nearby for children under 12. One offer per family; sibling discounts and referrals combine with any offer.
